Lester Snow  
Executive Director  
Cal/Fed Bay/Delta Program  
1416 Ninth Street Suite 1155  
Sacramento CA 95814

Dear Executive Director Snow:

I hope all is well. I am very concerned about the building of new dams. I believe they are expensive and unnecessary. We need to first clean-up the massive problems that we currently have with the waste of water, not enough water for wildlife, ground water pollution and destruction of salmon habitat. In addition we need to fix the incredibly large problems we are now having with our storm drains, Huntington Beach, California is a perfect example.

- Guarantee more fresh water flows and prevent pollution at the source
- Please do not make taxpayers subsidize new dams or reservoirs or canals
- Restore our rivers
- Restore our bays
- Restore our fisheries
- Increase investments in water conservation and efficiency, and stop ground water depletion.
- Do not commit to building any new dams or expanding existing dams or reservoirs or canals during the first seven year of the program "stage one".

Thank you so much for your time and concern.

Regards,

  
Paul Arms
